ANODISED-ALUMINIUM ROOF RACK for self-assembly

This range is designed to be assembled quickly and easily.

These boxed products can be shipped to any location, with greater ease than a welded roof rack.

- MTS has designed this new roof rack drawing on a wealth of savoir-faire and expertise in fulfilling the most exacting of user requirements.
- Supplied as part of a kit, it is quick and simple to install on your vehicle thanks to the quarter-turn fasteners.
- Bars can be removed or added on request.
- The position and tilt of the spoiler can be adapted.
- This roof rack is equipped with an adjustable notched rear roller to facilitate rotation when loading (adjustable resistance).

Suitable for all vehicle sizes
(length and height)

Very small format

Medium format

Large format

Extra-large format

Accessories

Warning triangle

Belt retractor unit

Anti-theft ladder locks

Revolving light

Safety light

Why choose this roof rack?

- Quick and simple installation on the vehicle's original fixings, without drilling into the roof.
- Manufacturer's guarantee retained.
- Anodised for an attractive finish and to ensure durability over time.
- Increased load capacity, as lighter than the other ranges (steel and welded aluminium).
- Equipped with roller and spoiler as standard.
- Delivered in one or more compact-sized boxes (1920 x 230 x 200 mm), depending on the roof rack dimensions.

Compatible MTS rear door ladders
